

Bug 1: Search by owner is not working.

Steps:

1. Click on search by Owner search field.
2. Enter any value.(For ex. Test).

Expected result:

- If the entered value is not there on the notes listing page it should display that note and if it is not there it should display some msg.

Actual result:

- It is not displaying any msg or any notes.

Notes: "Search by Owner" search field is not working.

Bug 2: While adding notes success msg should display.

Steps:

1. Click on the Login button.
2. Add credentials displaying on that page.
3. Click on the submit button.
4. Click on the profile button after successfully logged in.
5. Add some value in the "note content" text box and click on submit.

Expected result:

- It should display some msg to let the user know that one note has been added successfully.
- Value added in the text box of "note content" should be removed once it is added on page.

Actual result:

- Neither a msg nor a total number of notes is displayed.

Bug 3: Alignment and sequence of adding notes are not proper.

Steps:

1. Click on the Login button.
2. Add credentials displaying on that page.
3. Click on the submit button.
4. Click on the profile button after successfully logged in.
5. Add some value in the "note content" text box and click on submit.
6. Verify alignment and sequence of the notes.

Expected result:

- Alignment of all notes should be proper regardless of values entered in notes.
- Sequence of all notes should have some proper ordering to follow.(For ex check sequence1 and check sequence 2 should display one after another.)

Actual result:

- Nor the alignment or the ordering is proper on this page.

Bug 4: Owner name should have some value.**Steps:**

1. Click on the Login button.
2. Add credentials displaying on that page.
3. Click on the submit button.
4. Click on the profile button after successfully logged in.
5. Add some value in the "note content" text box and click on submit.
6. Go to the search page and verify the value is the owner name.

Expected result:

- It should display the owner name value on the search page.

Actual result:

- It is displaying an object on the search page.

Bug 5: When there is no data for searched text it should display some msg.**Steps:**

1. Click on the Login button.
2. Add credentials displaying on that page.
3. Click on the submit button.
4. Click on the search page.
5. Add some value in the search box which is not added in notes.
6. Verify that page.

Expected result:

- It should display some msg like "No result found"

Actual result:

- It is displaying a blank page.

Bug 6: Verify logout scenario for user.**Steps:**

1. Click on the Login button.
2. Add credentials displaying on that page.
3. Click on the submit button.
4. Add some notes.
5. Click on the logout button.

Expected result:

- Users should be logged out of the system and redirected to the login page or home page.

Actual result:

- User is not redirected to any page and just logged out of the system.
